FEATURES

The BLANC YSD-200A is a professional-grade lighting solution designed for theater, studio, and event applications. It features a **200W LED engine**, **smooth 0–100 % electronic dimming**, and a **wide 20°–50° zoom range**, giving you powerful, flexible illumination with precise beam control. Compatible with **DMX512 and manual control**, it adapts easily to both live and controlled lighting environments.

Built for reliability and ease of use, this spotlight includes a **clear LCD display**, **manual focus adjustment**, and a **quiet cooling system with aluminum radiator**, all housed in a rugged yet lightweight aluminum body. Ideal for productions, broadcast studios, houses of worship, and performance venues, it delivers consistent performance with a professional finish.
